About Me

I'm a Computer Engineering student passionate about exploring various domains including IoT, software, hardware, web development, AI, ML, etc. I believe in gaining broad knowledge and applying creativity with technical skills through practical projects. My transferable skills and experiences from graphic design to embedded systems ensure I contribute effectively in diverse environments, demonstrated by my ability to design, assemble, and program complex hardware systems.

Projects

Amazon Price Tracker Automation

2025

Automated price tracking project on Amazon

- Developed an automated script using Selenium and Python to track product prices on Amazon.
- Extracted product names and prices, skipped ads, and saved results in Excel for easy comparison.
- Simplified user workflow by eliminating repeated manual price checks.

Aerial Photography Drone

2024

Developed an aerial photography drone with live video and location tracking.

- Designed an aerial drone using Arduino Mega, ESP32-CAM, and GPS (NEO-6M).
- Enabled live video streaming via embedded web server.
- Integrated Bluetooth (HC-05) for real-time GPS tracking.
- Focused on embedded systems, IoT, and autonomous navigation.

Food Ordering Website (Frontend)

2024

A user-friendly food website showcasing menus and enabling easy online ordering.

- Developed a fully responsive food ordering website using HTML, CSS, and JavaScript.
- Added smooth UI animations, interactive buttons, and category-wise menu layout.
- Learned how to structure a website, make it responsive for different devices and add interactivity

Interactive Whac-A-Mole Game

2023

Built an interactive Whac-A-Mole game in Scratch.

- Implemented score tracking, time limits, and sprite animations with randomised mole movement.
- Strengthened the understanding of game logic and user interaction principles.

Experience

InAmigos Foundation

Graphic Design Intern

2024 - 2025

Graphic design intern

- Designed social media graphics and posters
- Collaborated with teams on creative ideas
- Contributed to idea generation and concept development during discussions

Skills

IoT MySQL GitHub Selenium Python Arduino Bluetooth E Commerce HTML CSS JavaScript C/C++ Java MongoDB
Linux Canva React

Education

ZHCET, Aligarh Muslim University	Aligarh, U.P, India
B.Tech in Computer Engineering	2024 - 2028
Women's Polytechnic, AMU	Aligarh, U.P, India
Diploma in IT Engineering GPA: 9.6 / 10.0	2021 - 2024
St. Fidelis Sr. Sec. School	Aligarh, U.P, India
High School GPA: 9.53 / 10.0	2021

Skills

 Soft Skills Problem-solving, creativity, adaptability, communication, and leadership	 Programming Languages Familiar with programming languages including C, C++, Java, and Python (basic), HTML, CSS, JavaScript	 Graphic Design Proficient in graphic design using Canva for posters, brand logos, and book covers
 Databases Knowledgeable in databases like MySQL and MongoDB, and DBMS.	 Tools & Platforms Experienced with tools and platforms like Visual Studio Code and Linux (CLI)	

Key Achievements

 University Merit Scholarship Awarded University Merit Scholarship for consistent academic excellence during diploma (2022-2024)	 Diploma in Engineering Rank Holder Secured first rank -Diploma in Information Technology. Direct admission in B.Tech Computer Engineering via Merit (2024)	 AMU Dallas-Fort Worth Alumni Scholarship Awarded AMU Dallas-Fort Worth Alumni Scholarship for academic performance and interview selection (2024-2025)

Design and Performance Analysis of an Integrated Quadcopter System for Aerial Photography with Real-time GPS Tracking and Video Streaming Capabilities	
Faariah Waseem, Kunika Varshney	
The paper outlines the methodologies employed in designing and integrating the drone's components, along with insights into overcoming technical challenges. Furthermore, the paper presents a thorough analysis of the drone's performance based on various test flights, showcasing its ability to achieve the desired altitude and capture complete views. The insights provided in this paper aim to contribute to the ongoing advancements in drone technology, offering a foundation for future developments in this dynamic field.
